DATE:

PUBLIC CLOUD CREATING AN INSTANCE IN SALESFORCE

AIM:

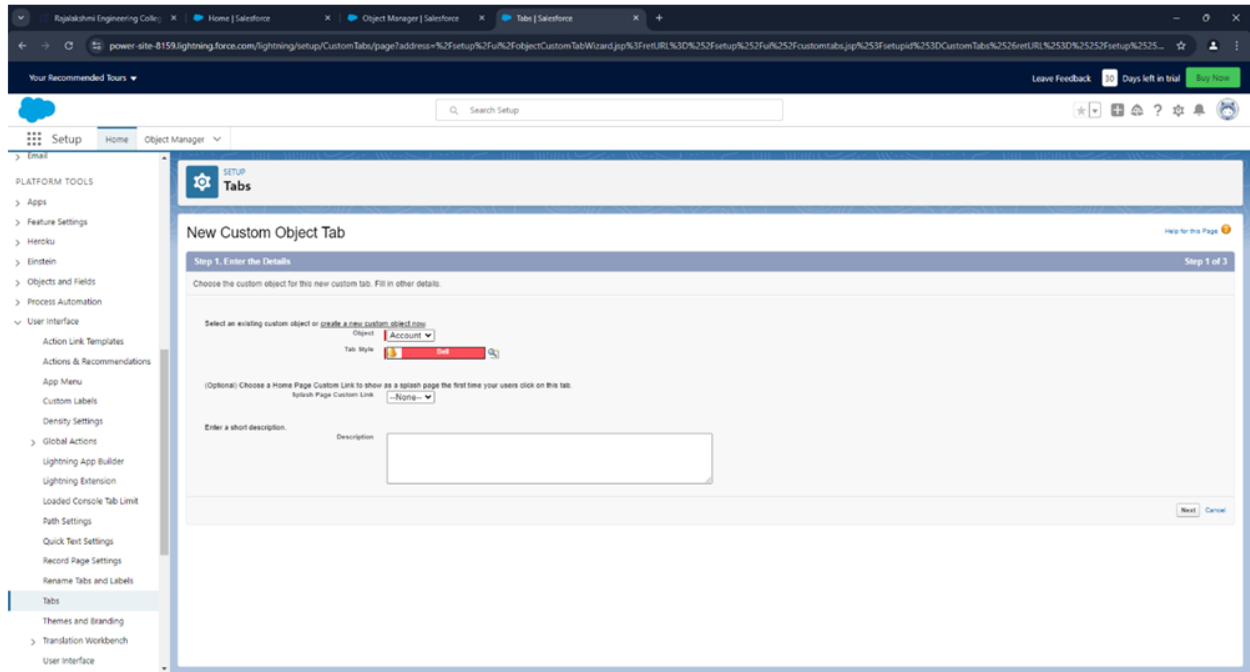

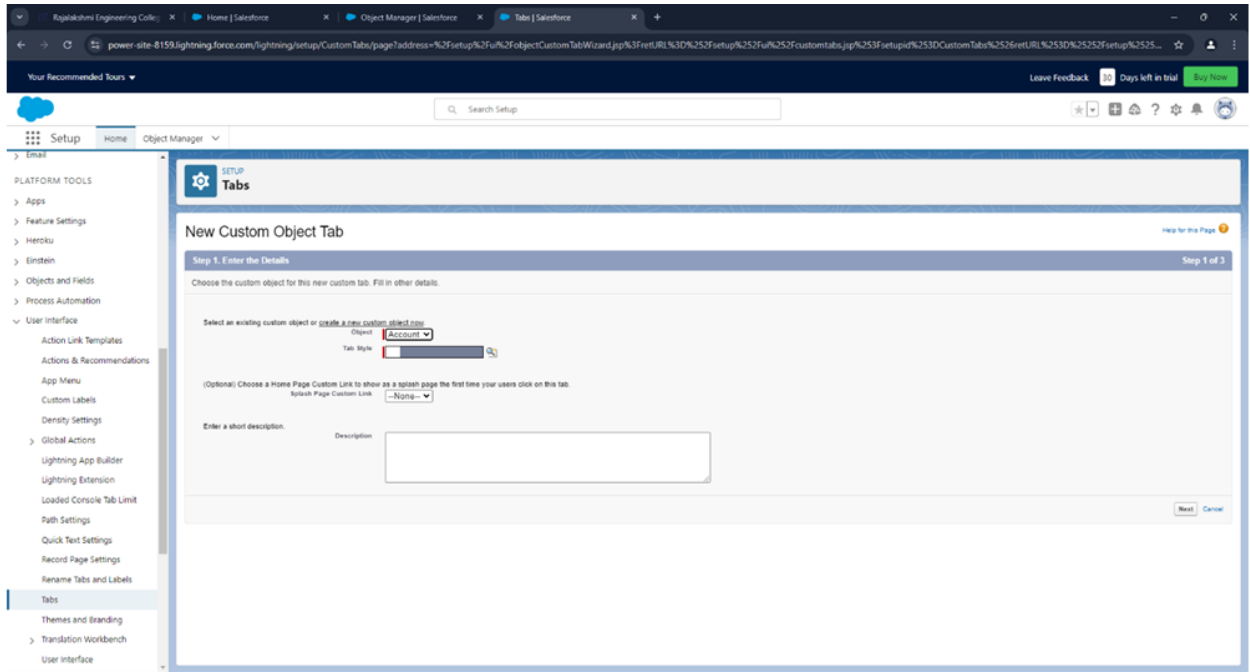

Develop a simple application to understand the concept of PAAS using Sales force

PROCEDURE:

- 1.Log in to your Salesforce account.
- 2.Click Setup at the upper-right corner.
- 3.Under the Build section, click Create and select Objects.
- 4.To create a custom object, click New Custom Object.
- 5.Enter the name of the Custom Object in Label, Plural Label, and Object Name.
- 6.Choose the custom apps for which the new Custom tab is required and click Save.
- 7.Select whether you want to define a custom app or a Salesforce console.
- 8.Give the app a name and description. An app name can have a maximum of 40 characters, including spaces. Click Save.

OUTPUT:

The screenshot displays the Salesforce 'New Custom Object' configuration page. The top navigation bar shows the 'Setup' tab selected. The main heading is 'New Custom Object'. Below this, there is a section for 'Custom Object Information' with fields for 'Label' (set to 'Account'), 'Plural Label' (set to 'Accounts'), and 'Object Name' (set to 'Account'). A 'Description' field is also present. The 'Data Type' is set to 'Text'. The page includes a 'Save' button and a 'Cancel' button. A warning message at the bottom states: 'Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.'

Setup

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.
